

Job Description: DevOps Engineer

Looking for a DevOps Engineer to streamline development and deployment processes.

Key Responsibilities

- Maintain CI/CD pipelines.
- Automate infrastructure provisioning.
- Monitor system performance and reliability.
- Collaborate with development teams for smooth releases.

Required Skills

- Experience with Docker and Kubernetes.
- Knowledge of AWS, Azure, or GCP.
- Familiarity with CI/CD tools like Jenkins or GitHub Actions.
- Understanding of Linux systems.

Professional Experience

- 2+ years of DevOps or system administration experience.
- Hands-on experience with cloud infrastructure.
- Experience managing production environments.
