Job Description: QA Engineer

We need a QA Engineer to ensure the quality and reliability of our software products.

Key Responsibilities

- Design and execute test cases.
- Identify, report, and track bugs.
- Perform regression and performance testing.
- Collaborate with developers to improve product quality.

Required Skills

- Knowledge of manual and automated testing.
- Experience with Selenium or similar tools.
- Understanding of SDLC and STLC.
- Strong attention to detail.

Professional Experience

- 1–3 years of QA/testing experience.
- Experience in web or mobile application testing.
- Exposure to test automation frameworks.
